

National Youth Leadership Training

Medical Permission Slip

As in your son's or daughter's home unit, sometimes it is necessary to provide medical attention for minor aches and pains. For that purpose we have listed several medications below for you to choose from should the need arise to give them to your son or daughter. We recommend that you use the weight based chart on the back of this form as a guide on which dosage to select. It is also necessary that we have permission to dispense the doctor prescribed medication that you have listed below.

Scout's Name

Weight (lbs.)

He/She is in good physical condition at the present time. He/She may receive emergency medical treatment at my expense. I also give my permission for the Adult Leaders of his NYLT Course to dispense the listed medications to my son or daughter. All of these medications and listed strengths are over the counter medications. Please check all that apply.

Tylenol (acetaminophen) 325mg tablets:

Benadryl Cream (diphenhydramine)

Tylenol (acetaminophen) 500mg tablets:

Hydrocortisone Ointment

Tums Tablets (calcium carbonate)

Imodium AD (loperamide)

Ibuprofen/Advil/Motrin (ibuprofen) 200mg tablets

Benadryl (diphenhydramine) 25mg tablets

In addition, my son/daughter is taking the following prescription medication that is provided by you in their original containers.

MEDICATION**DOSAGE**

SIGNATURE OF PARENTS OR GUARDIANS

EMERGENCY ADDRESS (Fill out only if different from your own).

Phone number where I can be reached Home

Cell

See weight based form on the back of this permission slip
